

Auriel Fournier

I'm a fourth year PhD Candidate studying wetland management tradeoffs for rails and waterfowl during fall migration in wetlands in Missouri with the U.S. Fish and Wildlife Service and Missouri Department of Conservation. I also work on questions about migratory connectivity of rails and their natural history. Originally from Ohio where I started my career working on various projects, including rail work with Black Swamp Bird Observatory I did my undergraduate at Michigan Technological University in Wildlife Ecology and Management and have been active in field research for over a decade in half a dozen states. I'm currently the Treasurer for the Student Development Working Group of TWS and the University of Arkansas Biology Graduate Student Association. More details on me and my research can be found here: <https://aurielfournier.github.io/> or on twitter @RallidaeRule
