Leadership Experience (professional and organizations, up to 5):

New York Chapter Editor NYS Chapter Newsletter 2005-2018, NYS Chapter Secretary 2008-2010, NYS Chapter Treasurer 2010-2011 NYS Chapter Vice-President 2011-2012, President-Elect NYS Chapter 2013, President NYS Chapter 2014-2016. Having served the NY Chapter for over 10 years in a number of capacities, I was able to learn the different skills necessary to effectively run a state chapter.

TWS Leadership Institute class of 2012. This was one of the best leadership experiences of my professional life. I was able to really dive deep into what it means to be a leader in the wildlife field and meet and learn from a number of professionals and peers. I have continued to be involved with the Leadership Institute at Annual Meetings and on different LI Committees.

Program Director, Green Mountain College and Keystone College. Through these positions, I have become very familiar with the certification requirements, having re-designed 2 majors to guide students to certification. I am advising current students at my new position to choose coursework that will enable them to be certified upon graduation.

Instructor, Conservation Leaders for Tomorrow. This program has been an amazing opportunity to reach out to young professionals in the field of natural resources and educate them on the rich culture of hunting and trapping in the United States. Working with like-minded professionals at all stages of their careers has really added to my skills and knowledge of wildlife management and conservation.

Principal Professional Interests: Conservation, management, wildlife health, anthropogenic impacts on wildlife, student involvement

Views (limit 250 words): I feel that the wildlife field is ever-changing. We are developing new techniques and technologies, and attracting a more diverse professional base. While still maintaining our rich history and culture as wildlife conservationists, we need to adapt to the changing world around us. We need to work to encourage and engage our young professionals (and students), and listen to their concerns and needs while expanding our professional development opportunities for all levels of the profession. Wildlife professionals need to take a strong stance on preserving and conserving our wildlife and wild lands so that future generations can learn and live better than we did. We need to strive as professionals to reach out to the public and our youth to continue the love of the outdoors and all it has to offer. It's a challenge, in this time of technology, to express the importance of nature, but we are at a critical turning point ecologically. As a member of council, I will work to create ways to open up our field to a diversity of talents and strive to creatively support all the professionals in this field that want to make the world a better place for all.
