**EDITOR-IN-CHIEF**

**Paul R. Krausman**

**JOURNAL STAFF**

**Allison Cox**, Content Editor

**Anna Knipps**, Editorial Assistant

**ASSOCIATE EDITORS AND SUBJECT AREA**

**Sarah Baker**, McNeese State University: herpetology, conservation biology, amphibian and reptile diseases

**Vernon Bleich**, University of Nevada Reno: behavioral ecology, ungulates

**Bill Block**, USDA Forest Service: avian ecology, small mammal, reptile, amphibian ecology

**Lauren Bortolotti**, Ducks Unlimited Canada: waterfowl, wetlands

**Ying Chen**, University of Hong Kong: Asian studies

**Daniel Collins**, U. S. Fish and Wildlife Service: wetlands, migratory game bird ecology and management

**Jack Connelly**, Idaho Game and Fish (retired): game bird ecology and management, harvest management

**Courtney Conway**, University of Idaho: behavioral ecology, bird-habitat relationships, migration

**Steeve Côté**, Universite Laval: behavioral ecology of large herbivores

**Courtney Duchardt**, Oklahoma State University: rangeland ecosystems, community and landscape ecology, grassland avifauna

**David Euler**, Lakehead University (retired): wildlife habitat, big game management

**Gavin Jones**, USDA Forest Service: habitat relationships, fire ecology, population ecology, raptors

**David King**, USDA Forest Service: wildlife ecology and conservation with emphasis on Neotropical migratory birds

**Amy J. Kuenzi**, Montana Technological University: small mammal ecology

**Lincoln Larson**, North Carolina State University: human dimensions of natural resource management, conservation social science

**Diana Lafferty**, Northern Michigan University: conservation physiology, foraging ecology, wildlife gut microbiome dynamics

**Quresh Latif**, Bird Conservancy of the Rockies: applied quantitative avian ecology, population and community models

**Andrea Litt**, Montana State University: population ecology, restoration ecology

**Erika T. Machtinger**, Pennsylvania State University: veterinary entomology, parasitology

**Jason Marshal**, University of Witwatersrand: large mammal ecology, quantitative ecology

**Scott M. McCorquodale**, Washington Department of Fish and Wildlife: large mammal ecology

**John McDonald**, Westfield State University: bears, forest wildlife, wildlife education

**Philip McLoughlin**, University of Saskatchewan: terrestrial large mammal ecology

**Terry A. Messmer**, Utah State University: human-wildlife interactions

**Kerry Nicholson**, Alaska Department of Fish and Game: furbearer and carnivore ecology

**Andrew Norton**, South Dakota Game, Fish and Parks: population demographics, large predators, and game species

**Zachary Olson**, University of New England: conservation genetics

**Cynthia Paszkowski**, University of Alberta: ecology of amphibians and reptiles

**Kelly M. Proffitt**, Montana Fish, Wildlife, and Parks: wildlife ecology, ungulate ecology

**Anthony Roberts**, U. S. Fish and Wildlife Service: wildlife demography, waterfowl ecology

**Robin Russell**, U. S. Geological Survey: disease ecology

**Kathryn Schoenecker**, U. S. Geological Survey: ungulate population biology, population estimation techniques, effects of herbivory

**Daniel Scognamillo**, Caesar Kleberg Wildlife Research Institute Texas A&M University – Kingsville: predator ecology, conservation

**James Sheppard**, San Diego Zoo Wildlife Alliance: spatial ecology, movement ecology

**Jeff B. Stetz**, Alaska Department of Fish and Game: large terrestrial mammal behavior, demography, genetics

**Jacob Straub**, State University of New York: waterfowl ecology

**Christopher K. Williams**, University of Delaware: waterfowl and upland gamebird ecology, wildlife policy

**Stephen Webb**, Texas A&M Natural Resources Institute: book review editor
