

Date:	10 April 2023	
Submitted to:	House Appropriations Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies	
Submitted by:	Don Yasuda, CWB® President, The Wildlife Society 425 Barlow Place, Suite 200, Bethesda, MD 20814	
Re:	FY 2024 Appropriations for APHIS, NIFA, and NRCS	
POC:	Caroline E. Murphy, AWB <sup>®</sup> , cmurphy <sup>@</sup> wildlife.org Government Relations Manager, The Wildlife Society	

Agency	Program	FY2023 Enacted	FY2024 TWS Recommendation
APHIS/Wildlife Services	Wildlife Damage Management	\$122 M	\$123 M
	Methods Development	\$26.2 M	\$27 M
NIFA/Formula Grants	RREA	\$4 M	\$10 M
	McIntire-Stennis	\$38 M	\$43 M
NIFA/Minority-Serving Institution programs	Hispanic Serving Institutions Education Partnerships Grants Program	\$16 M	\$20 M
	Alaska Native Serving and Native Hawaiian-Serving Institutions Education Grants	\$5 M	\$6 M
	1890 Institutions Centers of Excellence	\$10 M	\$11 M
NRCS	Private Lands Conservation Operations	\$827 M	\$904 M

The Wildlife Society (TWS; wildlife.org) inspires, empowers, and enables wildlife professionals to sustain wildlife populations and their habitat through science-based management and conservation. Founded in 1937, TWS and our network of affiliated chapters and sections represents more than 15,000 professional wildlife biologists, managers, and educators dedicated to excellence in wildlife stewardship. As leaders in wildlife science, management, and conservation, TWS promotes the use of science in all aspects of policy and decision-making and

is also committed to the identification and removal of barriers to recruitment, effective mentoring, and retention of a diverse workforce.

The Wildlife Society appreciates the opportunity to submit testimony concerning the Fiscal Year 2024 budgets for the Animal and Plant Health Inspection Service (APHIS), National Institute of Food and Agriculture (NIFA), and the Natural Resources Conservation Service (NRCS). We respectfully request the following programmatic funding in FY 2024. Thank you in advance for considering the views of The Wildlife Society.

## Animal and Plant Health Inspection Service

APHIS Wildlife Services resolves human-wildlife conflicts and protects wildlife, agriculture, and human health and safety from wildlife damage and wildlife-borne diseases. The **Wildlife Damage Management program** provides frontline assistance to cooperators to protect natural and human-made resources. We appreciate the increase for this program in FY 2023 and encourage Congress to provide another small increase in funding in FY 2024 to \$123 million as requested by the Administration. Maintaining inflation-adjusted funding levels will allow Wildlife Services to carry out programs identified by Congress as key focus areas, including the National Rabies Management Program, which distributes oral rabies vaccines to wildlife within targeted areas with the goal of disease elimination, and the feral swine management program, which works with cooperators to protect natural and human-made resources against this highly destructive non-native species.

**Methods Development**, also within Wildlife Services, funds the vitally important National Wildlife Research Center (NWRC), which provides tools that the Damage Management program, as well as federal, state, and local partners need to deter human-wildlife conflict in the field setting. TWS thanks Congress for increased funding in FY 2023 and requests another small increase in FY 2024 to allow the NWRC to continue to deliver new research critical to state wildlife agencies, federal agencies, and municipalities, including novel deterrents to prevent predator conflict with livestock, the development of new humane toxicants against feral swine, and research into the efficacy of fertility control applications in free-roaming horses.

## **National Institute of Food and Agriculture**

The **Renewable Resources Extension Act** (RREA) provides resources to state extension programs that share with landowners and managers the latest management tools applicable to forest and rangeland resources, including wildlife management. RREA funds private landowner outreach and effectively leverages cooperative partnerships at an average ratio of four to one. These extension programs improve management practices on over 43 million acres. Authorized at \$30 million, RREA has seen flat funding at only \$4 million annually for over a decade. TWS requests an increase in RREA funding to at least \$10 million in FY 2024.

The McIntire-Stennis Cooperative Forestry Program also has a long history of effectively leveraging outside dollars that benefit private land management practices. This program requires a 1:1 non-federal match for research projects related to producing, using, and protecting natural resources based on identified private landowner needs. The funds are targeted at public and land grant university research, which in turn fosters the next generation of natural resources professionals. Private landowners own approximately 300 million acres (over 35%) of the nation's forests and woodlands. Funding of \$43 million in FY 2024 will allow NIFA to make continued investments in conservation and management techniques on the nation's private lands. The USDA's budget request includes \$370 million for Minority-Serving Institution programs, which support capacity-building initiatives, education, and pathways to employment at minority-serving institutions. TWS strongly support policies, programs, and practices that advance efforts

to recruit, mentor, and retain professionals from a broad spectrum of identities, including individuals from historically underrepresented backgrounds.

The **Hispanic Serving Institutions Education Partnerships Grants Program** expands and strengthens academic programs in the agricultural sciences, natural resources, forestry, and other disciplines tied to the food and agriculture production and delivery systems at Hispanic-serving colleges and universities. TWS supports the administration's request for a \$4 million increase for this program and encourages funding at \$20 million in FY 2024.

The Alaska Native Serving and Native Hawaiian-Serving Institutions Education Grants are aimed at recruiting, supporting and educating minority scientists and professionals, and advancing the educational capacity of Native-serving institutions. TWS appreciates the recent increases in funding for this program and encourages funding at \$6 million in FY 2024.

The **1890 Institutions Centers of Excellence** are designed to supply the country with a globally diverse workforce and support critical global development needs, thereby addressing transboundary research and education challenges including climate change, biodiversity conservation and development. We encourage Congress to provide a small increase for this important program in FY 2024, bringing funding to \$11 million.

We also encourage Congress to support other USDA Minority-Serving Institution programs administered by NIFA, such as the National Scholars Program, which is intended to increase the number of minority students enrolling in agriculture, food, natural resource sciences, and other related programs in pursuit of a bachelor's degree at Land Grant Universities, and the Tribal Scholars Program, which seeks to increase the number of American Indian and Alaska Native students studying agriculture, food, natural resources, and related disciplines.

## **Natural Resources Conservation Service**

The Natural Resources Conservation Service (NRCS) is the primary federal agency working with private land and farm owners to help them conserve, maintain, and improve natural resources on their lands, including soil, water, air, plants, fish, and wildlife. In FY 2024, TWS requests that Congress provide full funding to the conservation programs authorized by the 2018 Farm Bill, which work with landowners to provide measurable benefits for fish and wildlife. TWS also urges Congress to provide critical discretionary funding for Private Lands Conservation Operations administered by NRCS, including Conservation Technical Assistance (CTA). The CTA program provides landowners with site-specific solutions needed to implement conservation programs, while also providing for public accountability to ensure funds are spent as intended. As Congress turns its attention to constructing and modifying private lands programs in the 2023 Farm Bill, demand for technical assistance will continue to grow. TWS requests Congress fund this vital program at the Administration-requested \$904 million in FY 2024.

Thank you for considering the views of wildlife professionals. Please reach out to Caroline Murphy, AWB®, TWS government relations manager (cmurphy@wildlife.org), with any questions regarding these recommendations.
