Values and conservation: Two different views

A killer app for tracking carnivores

Conserving the (not so) common tern

FEATURES

- 26 Getting Social in Wildlife Management**
These 10 tips will help managers make the most of social science data
By Daniel J. Decker, Ann B. Forstchen, Emily F. Pomeranz, Michael V. Schiavone and William F. Siemer

- 31 Creating a More Inclusive Future for Conservation**
What should we take away from the “Skirmish in Spokane?”
By Richard von Furstenberg and Lincoln R. Larson

- 36 Relevance, Mutualism and the Wildlife Profession**
To adapt to changing attitudes, the wildlife profession must stay rooted in its values
By Kim Thorburn

- 40 Fowl Women**
Often unsung, women have made multifaceted contributions to waterfowl conservation
By Sally E. Yannuzzi, Cheyenne Beach, Kaylan Kemink, Auriel M. V. Fournier and Susan N. Ellis-Felege

- 44 Conserving the Great Lakes’ (Not So) Common Tern**
Wildlife damage management is fortifying the future for Ohio’s breeding tern population
By Caleb Wellman and John Paul Seman

- 48 Tracking Predators by Algorithm**
A computerized workflow helps biologists identify kill sites
By Nilanjan Chatterjee, Andrea Kölzsch, Sarah C. Davidson, Gil Bohrer and John Fieberg

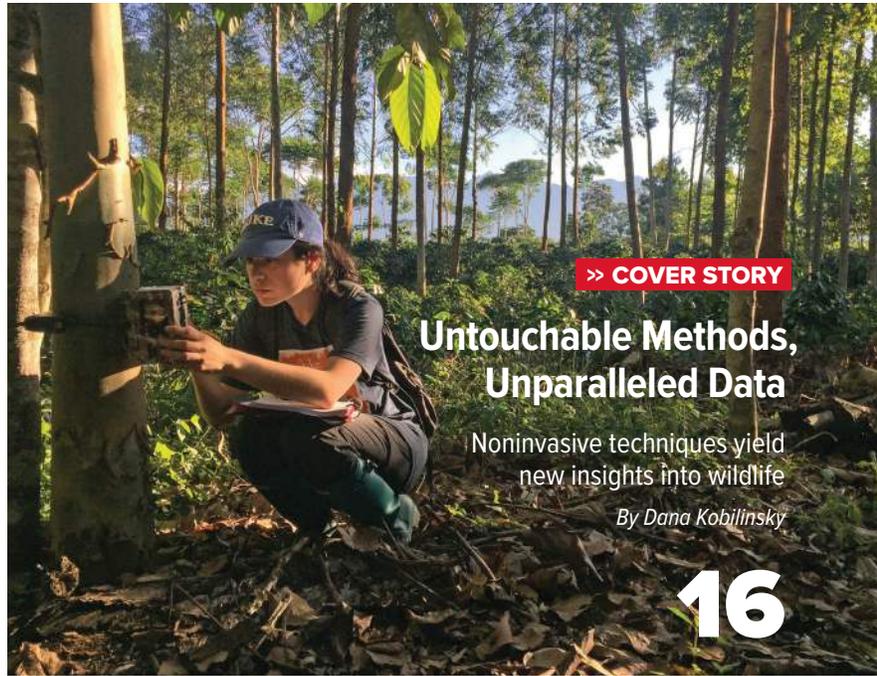

- 52 Thinking about the Past, Planning for the Future**
Will the next TWS Annual Conference make history?
By Cameron Kovach

Departments

- 4 Editor’s Note
- 5 Leadership Letter
- 6 Science in Short
- 10 State of Wildlife
- 14 Today’s Wildlife Professional
- 57 Policy Perspectives
- 59 Field Notes
- 60 Gotcha!
