The Honorable Lisa Murkowski  
Chair  
Subcommittee on Interior, Environment,  
and Related Agencies  
Senate Appropriations Committee  
Washington, DC 20510

The Honorable Jeff Merkley  
Ranking Member  
Subcommittee on Interior, Environment,  
and Related Agencies  
Senate Appropriations Committee  
Washington, DC 20510

The Honorable Mike Simpson  
Chairman  
Subcommittee on Interior, Environment,  
and Related Agencies  
House Appropriations Committee  
Washington, DC 20515

The Honorable Chellie Pingree  
Ranking Member  
Subcommittee on Interior, Environment  
and Related Agencies  
House Appropriations Committee  
Washington, DC 20515

Dear Chair Murkowski, Ranking Member Merkley, Chairman Simpson, and Ranking Member Pingree:

On behalf of the undersigned organizations, we encourage robust funding for the Migratory Bird Program of the U.S. Fish and Wildlife Service as part of the Fiscal Year 2027 Interior appropriations bills.

We are grateful for your committee's funding of FWS programs that contribute to migratory bird conservation, and the important steps that have been taken under your committee leadership to support vital conservation efforts.

For FY27, we encourage continued and growing support for bird conservation programs to address the ongoing needs and growing challenges facing migratory bird populations, which have declined by 3 billion birds since 1970. Bird populations provide valuable recreational and educational opportunities for the public, and help boost our economy as part of the \$394 billion in annual spending on wildlife-associated recreation activities. The next fiscal year provides a need to build on recent progress and fulfill the resources necessary to carry out the Service's important role in conserving migratory birds.

To that end, we recommend strong Congressional support for the elements of the Migratory Bird Program and its grants, to provide federal leadership on migratory bird conservation by implementing bedrock laws and grant programs, undertaking biological monitoring, coordinating with partners across the nation and internationally, offering technical assistance, issuing permits efficiently, and more.

**Migratory Bird Management Program**

Conservation and Monitoring: This element provides critical conservation needs for the Program, including by supporting partnerships, working groups, and bird conservation planning efforts. The funding should ensure that each of the plans, including for waterfowl, landbirds, shorebirds, and

waterbirds, have sufficient funding for staffing, coordination, and implementation. This element also supports key needs for population monitoring and surveys, research, technical assistance and guidance, species conflict reduction, efforts such as the Urban Bird Treaty program, which helps to conserve habitat and enhance engagement with communities, and Adaptive Harvest Management, which provides the necessary science to support gamebird hunting seasons and bag limits. At least \$40.85 million is needed for FY27 for this element to continue to meet these responsibilities, and the growing challenges facing migratory birds.

Permits: To help meet the Program's responsibilities for permitting, at least \$13.43 million is needed for staff capacity for the Permits element, along with further support for the ePermits program, to help promote efficient, modernized, and coordinated permitting efforts. These resources can help support regional office staff in processing permits and provide technical assistance and training to help meet the needs of the public.

Federal Duck Stamp: The Duck Stamp program has been a successful venture for decades, and funding helps to support implementation of this program, including the Duck Stamp contest. The program has raised more than \$1 billion in funding since its inception, which has been invested back into wetland conservation and other habitats to benefit the National Wildlife Refuge System and the birds it supports, including waterfowl, shorebirds, songbirds, and more. At least \$1.14 million in FY27 will allow for the expansion of states offering the e-Stamp and the continued success of the Federal Duck Stamp program.

North American Waterfowl Management/Joint Ventures: The network of Migratory Bird Joint Ventures provides highly valuable partnerships that bring together 5,700 partners to focus on landscape-level bird conservation delivery through non-regulatory and incentive-based programs. Since 1986, Joint Ventures have leveraged \$36 of non-federal partner funds for every federally appropriated dollar and have conserved 33 million acres to benefit birds and people. To help support conservation needs, we recommend an increase in base funding, and a \$21.02 million funding level will provide an important step forward.

### **North American Wetlands Conservation Act**

Since 1991, the NAWCA program has been a highly popular and successful conservation effort that protects and restores wetlands and associated habitats on both public and private lands. It has leveraged \$4.7 billion to benefit 33 million acres from 3,450 projects in the U.S., Canada, and Mexico, contributing to the long-term recovery of many wetland-dependent birds, and we urge continued robust funding levels for the program, with at least \$50 million for FY27.

### **Neotropical Migratory Bird Conservation Act**

More than 350 species of birds migrate annually between the U.S. and Canada, and Latin America and Caribbean, including many species of songbirds and shorebirds facing steep declines. Providing the full authorized funding for the NMBCA, with at least \$6.5 million for FY27, will support essential conservation needs for our bird populations across their full migratory ranges. Since 2002, more than 740 projects funded by the NMBCA have positively impacted more than 6 million acres of bird habitat for migratory birds in the United States and 42 additional countries along their flyways.

Broad, stable funding for conservation programs is a cost-effective investment that protects wildlife, sustains outdoor recreation economies, reduces future disaster and mitigation costs, and ensures agencies can address both conservation priorities and emerging challenges such as wildlife disease and invasive species. In addition to the programs specifically listed in this letter, the undersigned organizations recognize that sufficient funding for a broader suite of federal conservation is a necessary component of supporting migratory bird conservation. We encourage the committee to also consider support for broader conservation programs that enable science-based management and provide sufficient professional capacity to recover species, maintain healthy ecosystems, and promote resilient communities.

Thank you for your consideration of these requests and your leadership. We look forward to continuing to work with you to support conservation efforts to benefit birds and people across the nation and their international flyways.

Sincerely,

American Bird Conservancy
